

- 1) Assemble mounting screws to backpan using hexnut.
- 2) At the center of the backpan are knockout slots. Remove the set that matches your outlet box.
- 3) Secure the backpan to the outlet box.
- 4) Anchor the backpan to the wall using the set of holes at each end of fixture using wood screws, toggle bolts, plastic anchors, etc.
- 5) **TURN OFF POWER.**
IMPORTANT: Before you start, NEVER attempt any work without shutting off the electricity until the work is done.
 - a) Go to the main fuse, or circuit breaker, box in your home. Place the main power switch in the "OFF" position.
 - b) Unscrew the fuse(s), or switch "OFF" the circuit breaker switch(s), that control the power to the fixture or room that you are working on.
 - c) Place the wall switch in the "OFF" position. If the fixture to be replaced has a switch or pull chain, place those in the "OFF" position.
- 6) Connect fixture ground wire to outlet box ground wire with wire connector. Never connect ground wire to black or white power supply wire.
- 7) Make wire connections (connectors not provided). Reference chart below for correct connections and wire accordingly.

Connect Black or Red Supply Wire to:	Connect White Supply Wire to:
Black	White
*Parallel cord (round & smooth)	*Parallel cord (square & ridged)
Clear, Brown, Gold or Black without tracer	Clear, Brown, Gold or Black with tracer
Insulated wire (other than green) with copper conductor	Insulated wire (other than green) with silver conductor

*Note: When parallel wires (SPT I & SPT II) are used. The neutral wire is square shaped or ridged and the other wire will be round in shape or smooth (see illus.)

- 8) Carefully push wire connections back into outlet box making sure all connections remain secure.
- 9) Slip faceplate over mounting screws and backpan.
NOTE: Be certain wires do not get pinched between backpan and faceplate.
- 10) Secure faceplate to backpan using threaded balls.
- 11) Insert recommended bulb. Carefully push bulb into bulb support clip.
- 12) Lower glass down over socket.
