# TE Enhanced Series

# Extruded Channels for Tape Light

The Kichler Enhanced Series of Aluminum Extruded Tape Channels is a step up from a simple lighting effect. The 30-degree angled channel doubles as a 60-degree channel when rotated for expanded installation options. The surface and recessed channels in this series are broad - allowing for multiple strips of LED tape light. The added illumination takes your tape light installation from accent to ambient - ideal for task-driven applications.

### **Surface Mount**

These channels install onto a surface to create sturdy under-cabinet, shelving or even step lighting. Miter cut and connect for custom shapes.

#### **Recessed Mount**

By creating space within drywall, shelving or other surfaces, recessed channels can then be inset for a seamless, built-in lighting effect. Miter cut and connect for custom shapes.

With the Kichler Enhanced Series, you choose your components to create your desired channel assembly - similar to those shown above.

## **TE Enhanced Series - Surface Mount**

## Choosing a Channel Depth

- Shallow Channel sleek, cost effective, presents a light distribution that's true to its source
- **Standard Channel** common depth offers a light distribution that is gently diffused
- Deep Channel allows the light to blend within the channel, resulting in a greater diffused light

## Choosing a Lens

- •Clear Lens allows the most light through, noting that diodes will be more visible
- •White Opaque Lens diffuses the diodes more, as well as disperses the light output
- •Narrow and Medium Lenses utilized to create a thinner, more direct beam for a desired end effect.

Clear White Opaque

Medium

## **Choosing Your Accessories**

**1TEA090HCONN** SIL 90-degree connector bracket

1TEA180HCONN SIL Straight connector bracket

1TEA090VCONN SIL 90-degree vertical connector bracket

1TEA120HCONN SIL 120-degree connector bracket

**1TEMSC1RC** SIL Spring mounting clip

**1TEASPKSUS** SIL Pendant cable

Utilize brackets to extend the length of your channel design, or to connect mitered edges to create corners.

For recessed installations.

To suspend channels as a fixture.

#### TAPE SOLD SEPARATELY.

Kichler offers 6T Series 24V Tape as well as 4T Series 12V Tape.

See our **Indoor Lighting Systems (K517) Catalog** for more information or visit **Kichler.com** to view products and digital catalogs.

# Advanced Product Solutions (APS) & Layout

# Free layout and design services—and so much more.

From answering questions to creating detailed layouts to delivering a full bill of materials (BOM) – the Kichler APS & Layout team is your link to getting the job done. This free service takes the guesswork out of any lighting need you have: determining the scope of materials required, recommending dimmers and even creating a full wiring and product layout.

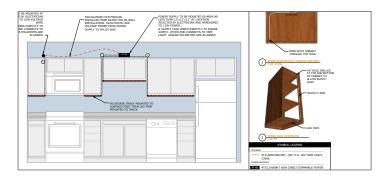

## **Layout Design Services**

Get to solutions faster and increase sales.

From choosing landscape lighting to maximizing a kitchen's functionality; from outfitting a restaurant with lighting to coordinating lighting throughout a home—these are just a few of the jobs our APS & Layout team can get done for you.

Contact us at layouts@kichler.com and we'll get you started:

- 1 Email us a completed Design Request Form (available at Kichler.com/APS) along with any drawings or pictures related to the job.
- 2 We'll create a BOM and email it back to you that same day (for all requests received by 3 pm EST).
- 3 Once you confirm the BOM and pricing, we'll return a completed layout design within 48 hours or less.

#### **Advanced Product Support**

No question is too complex.

Installation issue? Building code question? Regulatory stumper? If you've got a challenging question—we've got you covered. Our Advanced Product Support team received additional classroom and in-field training on all Kichler products, so you can get your question answered quickly. To take advantage of this free service, call our dedicated Advanced Product Support line at 844-KICHLER (844-542-4537) or email techsupport@kichler.com.
