2

Bord arrondi vers l'extérieur
Rounded side outward

Pour une installation sur une base en acrylique utiliser uniquement le double-face, ne pas percer
 For installation on an acrylic base, use only double-sided tape, do not drill

Utilisez le guide "large" si vous posez le pare goutte sous le panneau coulissant.
 Utilisez le guide "étroit" si vous n'installez pas de pare-goutte

Insert the "large" guide when you use the door swipe on the bottom of the moving glass door, insert the "Small" guide when not using any door swipe

4

Si nécessaire utiliser les cales 38 pour mettre de niveau
 If necessary use shim 38 to help level

11

Faire attention au sens des cache-vis
Pay attention to the direction of the screw cap

Pour régler le niveau du panneau coulissant utiliser la vis centrale des roulettes, visser pour faire descendre le panneau, dévisser pour le faire monter. S'assurer de toujours avoir environ 3/8" (10mm) d'espace entre le bas du panneau et le dessus de la base.
 Adjust the sliding door using the middle screw on the door's roller: tighten to lower and loosen to raise the sliding door. Ensure there is always a gap of approx. 3/8 inch between the bottom of the sliding door and the shower pan floor'

Selon les conditions d'installation, utiliser le joint #30 pour augmenter l'étanchéité de la porte.
Depending on the installation conditions, use the seal #30 to increase waterproofness

14

A: Si vous utilisez le pare-goutte #3 alors couper le joint d'étanchéité #30 comme ci-dessous
A: If you use door swipe #3, then cut waterproof seal #30 as below.

B: Si vous n'utilisez pas le pare-goutte #3 alors couper le joint d'étanchéité #30 comme ci-dessous
B: If you do not use door swipe #3, then cut waterproof seal #30 as below.

15

A: Si vous n'utilisez pas le joint d'étanchéité #30 alors couper le pare-goutte #3 comme ci-dessous
A: If you do not use waterproof seal #30, then cut door swipe #3 as below.

TROUBLE SHOOTING / DÉPANNAGE

If the slider has a grinding noise during operation, please refer to below instruction to resolve.
Si un bruit se fait entendre lors du déplacement de la porte, suivre les indications ci-dessous.

- 1: Ensure that the screws on the roller are fully tightened.
Assurez-vous que les vis des roulettes sont assez serrées.

- 2: Slightly loosen the screws at both ends of the roller track.
Desserrer les vis de fixation du rail.

3: Adjust the roller track, ensuring that the track is parallel, and it does not come in the roller mechanism.
Ajuster le parallélisme du rail afin d'empêcher tout contact avec les roulettes.

4: Re-tighten the screws at both ends.
Resserrer les vis de fixation du rail.
